Les tableaux se lisent en colonne.

Par exemple, 71% des admis à HEC étaient aussi admis à l'Essec, 85% à l'ESCP-EAP, 49% à l'EM Lyon, 40% à l'Edhec...
 Les taux de duplication d'admissions sont particulièrement élevés entre les écoles de la banque Ecricome, dont les équipes écrites sont communes aux 6 écoles. En effet, la plupart des candidats présentent plusieurs écoles de cette banque. En 2005, la moitié des candidats de prépas ont présenté les 6 écoles et 80% au moins 2 d'entre elles.

Par exemple, 70% des candidats affectés à HEC étaient admis à l'Essec et 84% à l'ESCP-EAP.
 Seuls 4% des candidats affectés à l'Essec étaient admis à HEC, car HEC a été choisie par la plupart des admis aux 2 écoles.
 A noter : 62% des candidats affectés à l'Essec Rouen étaient admis à l'Essec Reims et 41% de ceux affectés à Euromed Marseille étaient admis à l'ICN Nancy. Ces désistements dérogent à la hiérarchie habituelle de ces écoles.

* ESC Lille = Campus de Lille + Campus de Paris.
